

Label for horizontal DOT propane tanks (filled vertically), reminds filler that OPD-type valve is neither present nor required. May not be applicable in all U.S. states. This is a reproduction of commercially available but hard-to-find sticker.

CAUTION!

This cylinder is not equipped with an OPD (overfilling prevention device), in compliance with NFPA 58, 2001 Edition, and is exempt according to paragraph 2.3.1.5
